

# CARE COMMUNITY RESOURCE CENTER & ZUBAIDA MUZAFFAR MODEL SCHOOL

SCHOOL & ACADEMY

CARE TODAY FOR A BETTER TOMORROW

## Annual Function

In March, the Care Community Resource Center held its annual function. It was a big success in a way that other than award & prize distribution another great surprise about ZMMS was revealed. Every indisputable person and key experts highly admired the efforts that were put in to constructing a purposeful school building. They also appreciated efforts of students and their parents for giving hands to complete this project. To admire participants, teachers and outstanding student's awards and certificates were granted.

Actually, at the end of the function when the announcement was made about our new project Zubaida Muzaffar Model School, highlight was thrown on its purposes. That was obviously to serve in academia & to make a difference. & now by the grace of Allah almighty, this school is already working to make a difference in society. We are keeping our fingers crossed to watch and witness its success.

# Launching a New Project

After the big announcement of Zubaida Muzaffar Model School in our annual function the foundation of the school was laid on April 1, 2023. This project had taken more than 7 years to get completed. It was tireless work, and big credit goes to all participants, planners, financiers, labors, students and the local community. This school is providing quality education and activities in terms of all academic and non academic grounds. The administration and the staff of this model school are passionate to help the deserving community side by side with Care Community Resource Center.

# Activity Based Learning

The core aim of the Zubaidah Muzaffar Model School is the same as of Care Community Resource Center. Children are not only given academic grades, but are also involved in different mental and physical exercises. All activities are designed to boost their confidence, so they feel comfortable when deciding their interests regarding to their Career and other interests. They can differentiate between good and bad. And can get through difficult situations. Just for an example some people find history a boring subject. To make it easy and enjoyable we dedicate a day for discussion. Topics are broken in to small segments and process of brain storming and exchanging ideas makes it easier to understand and memorize the dry topic.

## Distribution of Badges

In order to create a sense of achievement and to exceed from each other CCRC has created different badges to wear. Students are given these badges at their different achievements and for obtaining different goals. Students also wear badges representing their class level.

## Importance of Water & Distribution of Water Bottles

In one of the workshops, children were briefed about resources of water. Emphasis was laid on conservation of water, drinking clean water, saving for other utilities Sources of reserving water when needed. Children were also told how the nature helps to reserve water and how human beings can maximize its utility

Students were very happy to participate in this activity.

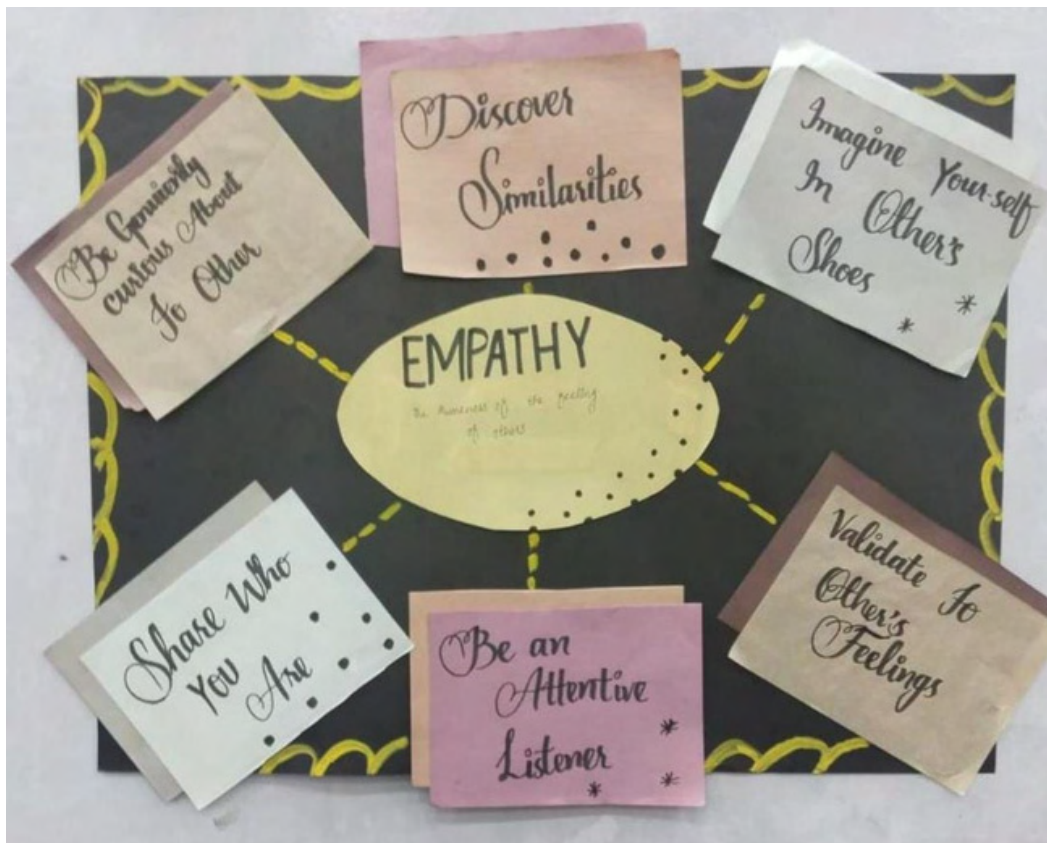

In this workshop the participant students were given reusable long lasting water bottles to carry with them all the time.

They were very fond of these bottles and loved them.

## Importance of Empathy

As Empathy was the topic of our discussions & practice in this semester. So we conducted a workshop on empathy. Empathy is said and referred as "Humdardi" in Urdu. This is the virtue which is highly emphasized in Quran and narrated in Ahadeess. Empathy is a highly valued trait and is essential for social interactions. Empathy is the ability to understand a person's emotions and feelings. It understands someone else's views and ideas. To support other's views and to understand them. It is an essential component for both professional as well as personal lives. It is the ability or trait to understand other people's values, beliefs and cultures. Empathy is the power of connection. It is a sensation of experiencing what the other person is going through. We need to practice this trait highly as we need it in our communities which are low not only on socioeconomic grounds but also very weak at moral values. We hope this learning will help our students to improve & grow in their moral levels.

## Creativity through Writing.

Another interesting writing activity was created, before starting writing contest the topic was discussed in details. As the writing was about "my family" So blessings and power of the family togetherness were discussed. How can we share happiness, how can my family take care of me and the vice versa. Sharing is the best quality that can keep a family happy and prosperous. Respect to the elders and affection to the youngers are the most valuable ascites of the family.

After discussing these important segments of the topic. Writing contest was taken place.

We were amazed to see great responses from the students. They described their families, their issues and probable solutions. It was fun to see how they were concerned about the well being of their loved ones. We hope this activity will leave great imprint on their minds and will play a positive part in their role as a family member.

## UpComing

1. Lecture on the importance of independence day.
2. Quiz related to the history of Pakistan.
3. Workshop on Justice.
4. Lecture on What is a leap year.
